CLM What is claimed is:

. . . of a cyclic aliphatic unsaturated compound selected from the group consisting of alpha damascone, beta damascone, delta damascone, isodamascone, damascenone, **alpha ionone**, beta **ionone**, allyl **alpha ionone**, isobutyl **ionone**, **alpha methyl ionone**, gamma methyl **ionone**, brahmanol, sandanol, **alpha terpeneol**, lyral, ethyl saffranate, and mixtures thereof; where in the cyclic aliphatic unsaturated compound at 100 .mu.M concentration inhibits at least 20% of LRAT or ARAT catalyzed **retinol** esterification as measured by an in vitro microsomal assay, and (c) a cosmetically acceptable vehicle.

. . . of a cyclic aliphatic unsaturated compound selected from the group consisting of alpha damascone, beta damascone, delta damascone, isodamascone, damascenone, **alpha ionone**, brahmanol, lyral, and mixtures thereof; where in the cyclic aliphatic compound inhibits at least 40% of LRAT or ARAT catalyzed **retinol** esterification and (c) a cosmetically acceptable vehicle.
